National Interlock System, Inc. National Interlock Model WR2	1
Smart Start, Inc. SSI 20/20	5
B.E.S.T. Labs Inc. FR9000	6

Note 1: The Committee on Testing for Intoxication was established in NRS 484.388 as a committee appointed by the Director of the Department of Public Safety to certify and approve breath testing devices as being accurate and reliable to test for intoxication, to keep a list of approved devices, and to certify individuals in their proper use. Prior to December 13, 1999, the list of approved devices was maintained in the Nevada Administrative Code (NAC), chapter 484, sec 606,631, and 701. The 70th Session of the Nevada Legislature repealed the NAC and tasked the Committee on Testing for Intoxication to maintain the list and make necessary changes. The effective date of this action was December 13, 1999, at which time all devices formerly approved by the NAC, were charged to the Committee on Testing for Intoxication. The items indicated by this note are devices that were approved on the NAC list as of December 13, 1999. The original acceptance date for those items under this note is a matter of record and can be obtained from the Nevada Legislative Council Bureau.

Note 2: Approved by the Committee on Testing for Intoxication on August 19, 2004.

Note 3: Approved by the Committee on Testing for Intoxication on January 19, 2005

Note 4: Approved by the Committee on Testing for Intoxication on October 13, 2005

Note 5: Approved by the Committee on Testing for Intoxication on August 8, 2008

Note 6: Approved by the Committee on Testing for Intoxication on February 18, 2010
